Discover Optimized Weight Balance

The PXW-Z450 is the industry-leading 4K shoulder-mount camcorder and it inherits – with favorable reception – the design concept of the PXW-X400 XDCAM camcorder.

Thanks to its ergonomic design, the PXW-Z450 camcorder achieves optimized weight balance; this lessens the weight on the lens grip and contributes to stable image shooting.

Multiple-Format Recording – XAVC Intra/Long 50p/59.94p

The PXW-Z450 offers well-accepted XAVC 4K (3840 x 2160) Intra/Long 50p and 59.94p formats. Further to this, de facto HD formats including XAVC Intra/Long, MPEG HD422, and MPEG HD are also supported. This camcorder allows you to shoot in robust HD and switch over to 4K for a variety of applications.

Simultaneous 4K (3840 x 2160) / HD Recording

The PXW-Z450 can also record 4K (3840 x 2160) and HD simultaneously.* This is helpful when you are operating both 4K and HD production in parallel.

* Available in 2017.

Low Power Consumption

With an improved inside circuitry design, the PXW-Z450 achieves power consumption as low as 24 W in normal recording mode*. This enables continuous recording operation while saving battery consumption.

* With XAVC recording, the color LCD is ON.

Variety of Network Functions

To support effective wireless ENG/EFP workflows, the PXW-Z450 incorporates a built-in wireless capability. Including ONLINE button operation, this camcorder

provides simple proxy transfer operation. This feature is extremely useful for 4K production. Further to this, the PXW-Z450 enables users to send streaming images during 4K image shooting.

Embedded RJ-45 Connector

NFC (Near Field Communication) for Easy Wireless LAN Connection

An NFC function supports easy connection for launching the CBM (Content Browser Mobile) application on a smartphone or tablet.

This means you can skip cumbersome setup procedures.

Versatile Output/Input Interfaces

In addition to common interfaces, the PXW-Z450 includes versatile I/O interfaces such as:

- Quad (x4) 3G-SDI output that enables output of up to 4K (3840 x 2160) 59.94p/50p signals*
- Multi-purpose audio input that accepts both analog audio signals and AES/EBU digital audio signals
- SDI input for pool-feed operation, so you can input and record 1.5G HD/SD-SDI distributed signals from another camera

Each connector is located separately and – as there’s no need for you to switch between input and output – you can use these connectors simultaneously.

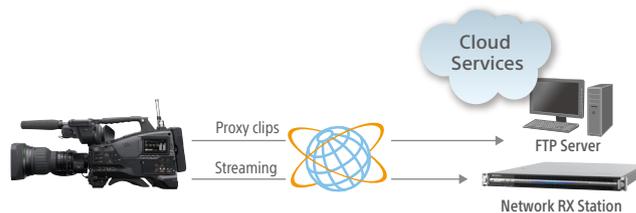

* The SDI 4K 59.94p/50p output function will be supported with an optional software upgrade available in 2017.

Networked Workflow

You can connect Sony’s PWS-110RX1 Network RX Station to send stable and high quality live streaming with Sony’s QoS technology. This allows you to send the HD-quality images without SNG or an external adaptor. The RX station can output SDI signals for live streaming and/or store streaming images in networked storage.

In addition, the RX station employs a web GUI to manage connection with the camcorder. Called the Connection Control Manager, this GUI can monitor the streaming live images, display a thumbnail list of proxy clips, and send the proxy clips to a networked FTP server. This provides efficiency in your workflow from image acquisition to the editing process.

Supports Full HD OLED Viewfinders

The PXW-Z450 supports a variety of Sony’s viewfinders, including the Full HD OLED HDVF-EL30 and HDVF-EL20. The OLED viewfinders are particularly useful for focusing 4K shooting. The HDVF-EL30 has a 960x540 resolution sub-LCD panel.
