## 1. Product Description

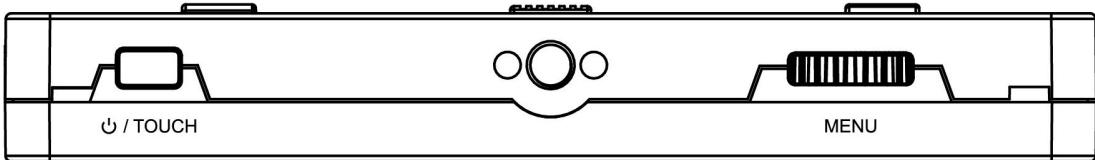

### ● Front Panel

### ● Back Panel

## 1.1 Button Instruction

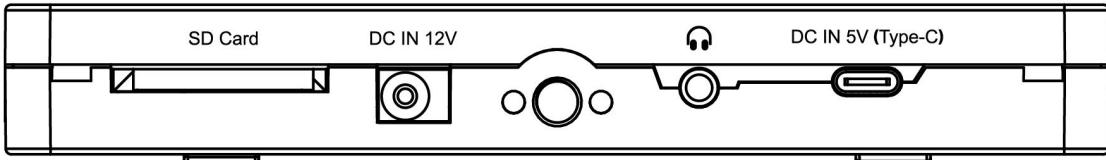

**POWER / TOUCH** : Long press to turn on and off the power; short press to turn on and off the screen touch function

**MENU:** Long press to open the main menu and short press to open the shortcut menu. Rotate the wheel to select a menu item, press it again to open the corresponding menu function.

(See details: **2.Menu Operation Instruction**)

## 1.2 Port Instruction (Bottom)

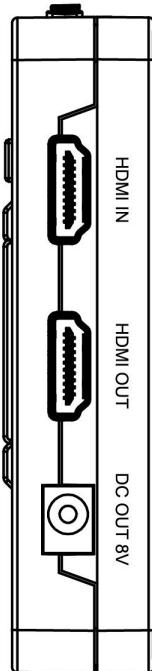

**SD Card:** SD card slot, 3DLUT upload via SD card and for firmware upgrade

**DC IN 12V:** DC power input, polarity as the input power 

**Headphone:** 3.5mm earphone port output

**DC IN 5V (Type-C):** (Note: This port can be connected to the power bank and is not used for data transmission; it is only used for local power supply and cannot provide loop-out power.)

### 1.3 Port Instruction (Left)

**HDMI IN:** V1.4, HDMI signal input, up to 4K@30Hz.

**HDMI OUT:** V1.4, HDMI signal output, up to 4K@30Hz.

**DC OUT 8V:** DC power output interface, polarity as the output power -  +

Barrel output for powering your camera with a separately available DC coupler via adaptor (NP-FW50 Sony & LP-E6 Canon&DMW-BLF19 Panasonic). More adapters coming soon.

### 1.4 Power Supply Way

(1) The rear cover of the monitor is equipped with F970 and E6 dual-purpose battery plate, which is applicable to F970 series of batteries and E6 series of batteries.

- **Sony F970 battery plate for battery of Sony DV:**

Sony F970 F960 F950 F930 F770 F750 F730 F570 F550 F530 series.

- **LP-E6 battery plate for battery of Canon DV:**

Canon LP-E6

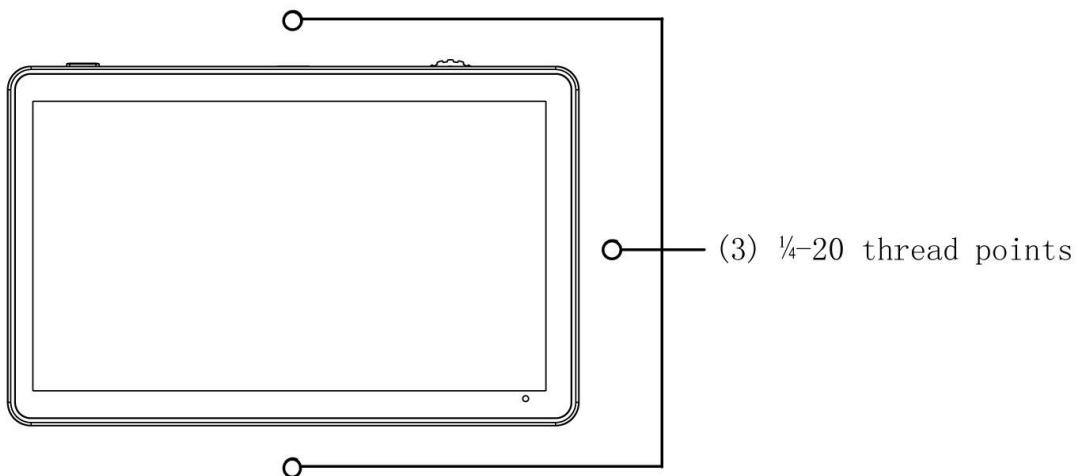

(2) Barrel (5.5mm outer, 2.1mm inner) at the bottom of the monitor, DC 7~24V Input.

(3) The bottom of the monitor has a Type-C 5V input power port, which can be connected to a power bank.

**Remark: It is recommended to use standard original F970 batteries. Different specifications of the battery have different capability. The working time for the monitor will be different. Higher capability (working time) will be longer. Please take off the battery from the monitor if you don't use the monitor in a long time.**

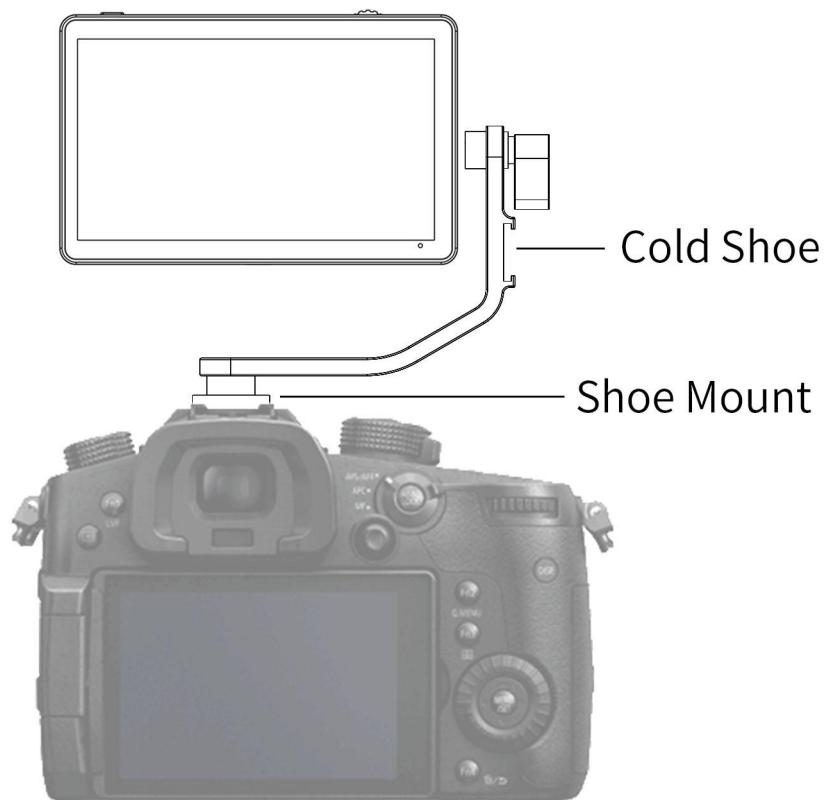

## 1.5 Mount Points

There are (3) ¼-20 thread points (top, bottom, & right side) can be easily connected to the hot shoe mount, tripod fixed installation.

## Tilt Arm Mounting

The monitor secures to your camera using the included Tilt Arm via shoe mount or 1/4"-20 thread. The Tilt Arm enables 180° of tilt for convenient monitoring at nearly any angle. A cold shoe on the Tilt Arm lets you secure equipment (like a microphone, LED light, or wireless receiver) that would otherwise be displaced from the camera's accessory shoe.

## 1.6 Sunshade

① Sunshade

② Sunshade Frame

**③ Fixed Frame**

**④ Sunshade Application**

First lock the Sunshade Frame ②with the monitor tight ③.

Open the sunshade ①, and match the sticker on the sunshade inside to the marked part of the sunshade frame ②, smooth and press 3 sides on the sunshade, and then complete the sunshade installation ④.

## **2. Menu Operation Instruction**

After the monitor is properly connected to the power supply, the indicator light is on (red). Press  $\odot$  / TOUCH button to turn on the monitor power. The indicator light turns yellow. After inputting the HDMI signal, the indicator light turns from yellow to green.

After startup, short press  $\odot$  / TOUCH to select to turn the screen touch function on or off.

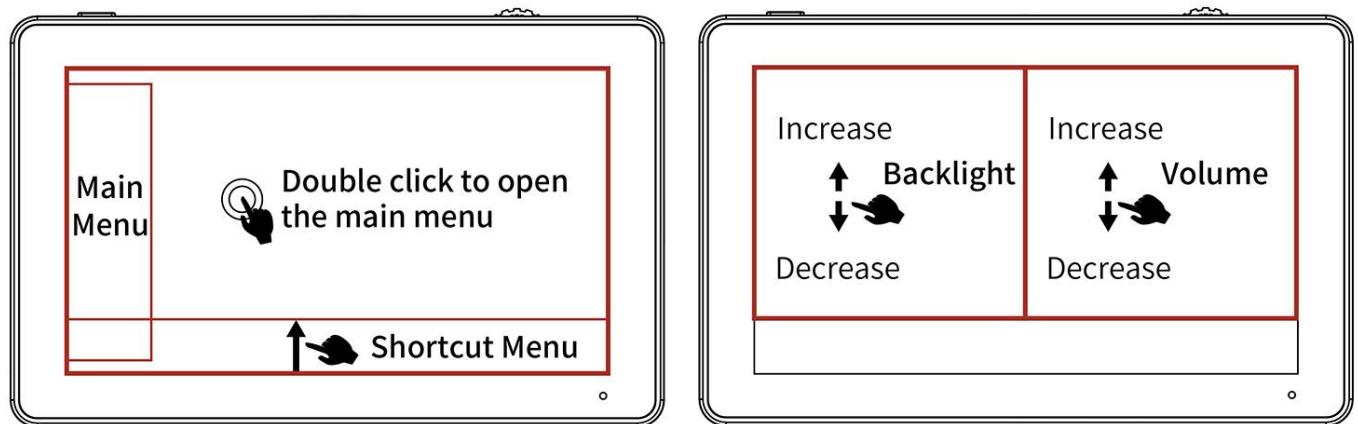

### **(1). Directly touch the screen for menu operation (turn on the screen touch function)**

- ①. Double-click on the screen to open the main menu (on the left side of the screen) and click on the corresponding menu to display the secondary menu. You can enter the corresponding function option to select or set with the "<" or ">" key of the

option. Exit the menu and press  key of the main menu or click the touch screen.

- ②. Swipe up from the bottom of the screen to open the shortcut menu and click on the corresponding menu to open or set the corresponding function. Double-click the shortcut menu function and select the function setting with the "<" or ">" key.
- ③. On the left side of the screen (1/2 split screen), you can directly adjust the brightness of the screen backlight; on the right side of the screen (1/2 split screen), you can directly adjust the volume.

**Figure:**

## **(2) Menu Operation of MENU Wheel**

- ①. When the menu is not displayed, directly rotate the wheel to backlight or volume adjustment. The wheel option can be set to  backlight or volume in the menu.
- ②. Long press the MENU wheel to open the main menu (on the left side of the screen). Rotate the wheel to select the secondary

function menu. After selecting it, press the wheel, then rotate the wheel to select or set the option function.

- ③. Short press the MENU wheel to open the shortcut menu (below the screen), rotate the wheel to select the shortcut menu option, press the wheel to directly turn on/off the function, if you press the parameter selection, repeat the above operation. The shortcut menu will automatically exit after about 5 seconds without operation.

### **(3) Screenshot Function Instruction**

This monitor supports screenshot, image overlay functions. The number of screenshots stored depends on the capacity of the SD card.

- ①. Insert the SD card into the SD card slot and connect the signal
- ②. Swipe your finger to the left on the right side of the screen to display the screenshot function menu. As shown below

	Screenshot	Click this icon to screenshot
	Image Overlay	Click this icon to turn on the overlay function, will display "Image will be showed when no menu" on the middle of screen, and click "OK". Then click  to turn off the menu to take the image overlay. You can adjust the transparency of the image (1~10) through the "Λ" or "∨" icons in the lower right corner after overlaying.
	Image Selection	Click this icon to display all of screenshots, click to select the overlay image you want
	Image Delete	Click this icon to select the image you want to delete, then click  to return.
