

The image features a red diagonal graphic on the left side. The background shows professional lighting equipment, including a large LED panel light with a grid of small lights and a softbox with a white diffuser. The text 'VIBESTA' is written in a bold, white, sans-serif font on the red background.

VIBESTA

MONITOR & LED LIGHTING

2015-2016

VIBESTA

Hi, we are Vibesta, the new brand of photography and video LED lighting and accessories offering a complete range of LED lights, from on-camera lights, 1x1 panels and multiple light kits as well as video monitors.

We make quality LED light accessible to all photographers and video makers, from enthusiasts to professionals. With features like daylight color rendering, high LED count and light output, our products pack high quality standards at very competitive prices, providing excellent value.

At Vibesta we want to help you create better images and movies. Go to your local dealer and see the difference.

VIBESTA.COM

FOR PHOTO AND VIDEO.

Vibesta LED lights are great for photography as well as video. The continuous lighting creates a natural and comfortable environment more similar to daylight. Along with the softer nature of the light this makes it especially great for the photography of people and portraits, but it can be used in many other occasions as well. From wedding scenes to baby's first steps and whatever you can imagine.

With Vibesta LED lights you capture what you see quickly and easily. They offer all the benefits of traditional flash lights, but are much simpler and faster to work with. Setting up the light and changing the intensity only takes a moment and doesn't require any measuring or testing. The continuous lighting makes it possible to really see the outcome of the photo before it is taken.

Vibesta LED lights are very energy efficient and produce very little heat. They are safe, long lasting and environmentally friendly.
